Attached is a list of initiatives the hotel has undertaken and copied below are standards and goals set by management and ownership. Below that I have copied a letter from PACE regarding certification. The Hotel will be listed in the next ReDirect Guide and is currently found by searching their site, <http://www.redirectguide.com/DENVER/Search.asp>

If you have any additional questions, please let me know.
Thank you,

St Julien Environmental Goal

The St Julien Hotel & Spa is committed to doing its part to minimize the impact of the Hotel and its guests on the environment. The St Julien realizes that the decisions we make as an organization affect not just the environment of our Hotel, but also that of the community. As such, the St Julien recognizes its need to constantly be aware of how it is affecting the world around it. In an attempt to continually improve our environmental efforts, the St Julien has formed a Green Committee, whose goal is to spearhead environmental efforts, which will reduce the Hotel's footprint on the community while maintaining the high level of service and quality demanded by our guests.

St Julien Partners Zero Waste Statement

The Owners of the St Julien Hotel & Spa believe that social responsibility to the environment is good citizenship and good business. Being in Boulder, Colorado, our clientele expect us to be environmentally conscious.

The ultimate goal for the St Julien Hotel is to become a Zero Waste Hotel. As such, the St Julien Hotel & Spa will aim to reduce its waste from its high of 33 tons per month to a maximum of 3.3 tons per month by September 2010. This represents a 90% reduction in waste.

The St Julien Hotel & Spa believes that implementing a Zero Waste Policy will make us stand out as a progressive hotel organization within our community and at the forefront of the environmental movement. We hope to inspire our employees as well as the Boulder community to follow our example.

Subject: PACE certified!

Rick,

Congratulations! On behalf of the PACE program, I am pleased to recognize your pollution prevention achievements and to certify Jill's Restaurant at the St Julien Hotel as a Partner for a Clean Environment in the PACE program. Jill's Restaurant is a leader in the community in efforts to recycle and approach zero-waste, use non-hazardous cleaning supplies, conserve energy and water, and use recycled content products.

As a certified partner, you will be listed in PACE advertisements throughout the year. You are welcome to use the PACE logo to publicize your environmental efforts " if you are interested I can email graphics.

It was a pleasure to sit down with you and discuss the PACE program and your environmental efforts. Thank you for your commitment to the environment and your participation in PACE! I will assess the MSDS info and we can sit down later this fall and highlight some of the opportunities and barriers and work towards a more comprehensive strategy with cleaning products that you may propose to the green team and management team in the coming year. Any information that you might have on the flexibility with cleaning product vendors would be helpful. Is the hotel contractually obligated to stay with a supplier for a period of time? Looking forward to stopping by with the recognition materials.

Thank you,
Amin Delagah
